Enthusiastic and dedicated student with a strong academic background in Technology. Demonstrates a keen interest in Development and a proven ability to quickly learn and adapt to new challenges. Eager to translate theoretical knowledge into practical applications and gain hands-on experience in software engineering.

## Education

### Dwarkadesh Jivanlal College of Engineering

*Bachelor of Technology in Computer Engineering*

**Expected 2026**

*till Sem4 - 8.20*

### Sardar Vallabhbhai Patel Vividhlakshi Vidyalaya

*Maharashtra State Board*

**March 2020**

*84.60%*

## Technical Skills

**Languages:** Python, JavaScript, HTML, CSS, Java, C++, C, Dart, Kotlin, SQL

**Technologies/Libraries:** MERN Stack, React.js, Next.js, Android Development (Kotlin), Flutter, Git, GitHub

**Blockchain:** Ethereum, Solidity, MetaMask, Smart Contracts, Hardhat

Proficient in full-stack development, adept at dynamic problem-solving with strong skills in JavaScript and Python, coupled with expertise in modern web and blockchain technologies, and a thorough understanding of data structures and algorithms.

## Internship

### Vighnotech Solutions

Full-stack developer for a CRM application focused on college admissions. Worked on data management, UI design, and backend integration, enhancing skills in CRM and full-stack development.

### AICTE – Google Android Developer Virtual Internship

[View](#)

Developed a chat application like WhatsApp in Kotlin, implementing real-time messaging, user authentication, and database integration. Enhanced proficiency in Android development and Kotlin programming.

## Certifications/Courses

- Udemy: Android 14 and Kotlin Development
- Udemy: The Complete 2024 Web Development Bootcamp

[View](#)

## Projects

### E-commerce Website | MERN Stack

[GitHub-Link](#)

Developed an e-commerce website for shopping watches with features like user authentication, product listings, an admin panel, and a secure payment gateway. Demonstrated strong skills in full-stack development using the MERN stack.

### NFT Marketplace | MERN Stack, Solidity for Smart Contracts

[GitHub-Link](#)

Created a full-stack NFT marketplace using the MERN stack and Solidity for smart contract functionality. Enabled users to create, buy, and sell NFTs securely, showcasing expertise in blockchain and full-stack web development.

## Achievements

- Google Developer Badges for Android Developer
- Leetcode problem solving skills
